## **DETAILED ACTION**

### ***Specification***

1. The amendment filed 04/01/04 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows:

a header magic number in a header-type separator, and a stopper magic number in a stopper-type separator. The original disclosure only supports a magic number in both a header-type separator and a stopper-type separator, which indicates to the examiner that the magic number in the header-type separator is the same magic number that is in the stopper-type separator.

Applicant is required to cancel the new matter in the reply to this Office Action.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 18-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed,

Art Unit: 2182

had possession of the claimed invention. The stopper separator containing a stopper magic number (see paragraph 1 above).

4. Claims 1, 4, 10-19 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the receiving CPU to achieve a read operation, does not reasonably provide enablement for the receiving CPU to achieve a read operation when the transmitting CPU performs: a write operation providing a separator to the local memory of the receiving CPU at a location pointed by the write head register, and a write operation of at least one message to the local memory of the receiving CPU at a location pointed by the write head register. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. The write operations performed by the transmitting CPU, as claimed, do not enable the receiving CPU to achieve a read operation.

#### ***Response to Arguments***

5. Applicant's arguments with respect to claims 1, 4, 10-19, have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 2182

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
